

PRODUCT DATA SHEET

elson LF PRV BOUNDARY R/A

20Ch C/OLIVE LF DR BRS LF76011

PRODUCT CODE LF76011

Technical Specifications

- Max. Inlet Pressure 1600kPa
- Max. Inlet Temperature(Continuous) 80°C
- Factory set pressure: 500kPa
- Flow Rate at Pressure 160 L/Min
- Material: DR Brass in compliance with AS 2345
- Threads comply with AS 1722.2.
- Suitable for potable water, Comply with AS/NZS 4020.
- WaterMark Certificate No. WMK26481, Conforms with AS1357.2 .

Elson Australasia Pty Ltd ABN 45 059 613 991

PRODUCT DATA SHEET

Features & Benefits

- 99.9% LEAD FREE* DR BRASS
- Excellent flow rates
- Fixed outlet pressure set
- Valve and strainer can be serviced
- Manufactured in our ISO9001 certified factory

Installation Instructions

Pipe work must be flushed prior to installation. This Valve can be installed horizontally or vertically. Ensure the valve is located that allows for easy access. Install in the direction of flow, elson valve flow direction indicated on body. When installed underground, the valve must be installed in a box and must be protected from becoming frozen. Never expose directly to flame or extreme radiant heat as this will affect valve seals and function.

Elson Valves must be fitted by a licensed plumber in accordance with AS3500.1.

Warranty

2 years

Application

Pressure Reduction Valves are fitted in water systems to moderate and stabilise mains water pressure. The valve maintains a constant maximum outlet pressure to protect downstream installations from variations in supply pressure description. The factory set pressure of the valve is the common pressure of 500kPa.

* Elson Lead Free copper alloy products contain less than 0.1% Lead by weight.
